Personal Homepage

Suwon, Republic of Korea
Nationality: China

LANGUAGES

- Korean: TOPIK Level 6, 2020
- English: TOEIC 730, 2019
- Chinese: Native

RESEARCH INTERESTS

- Microarchitecture Security
- Side-channel Attacks
- Processor Interconnects

TECHNICAL SKILLS

Arm Graviton / Intel Xeon	Research
Linux Kernel	Research
Computer Architecture	6+ yrs
Processor Security	6+ yrs
Mesh Interconnects	6+ yrs
Side-Channel Attacks	6+ yrs
C / C++	6+ yrs
Python	6+ yrs
Machine Learning	3+ yrs
Data Analysis	3+ yrs
Web Development	1+ yrs

Xingchao Bian

Integrated M.S./Ph.D. in Software College

Microarchitecture Security | Mesh Interconnect Security | Side-channel Attacks

PROFILE

I am an Integrated M.S./Ph.D. candidate in Software-FinTech Convergence at Sungkyunkwan University, specializing in microarchitecture and processor security. My research focuses on mesh interconnect security, side-channel attacks, and traffic-based vulnerability analysis on modern server and cloud platforms.

EDUCATION

Sungkyunkwan University (QS 2027: #108)

Mar. 2020 – Present

Integrated M.S./Ph.D. Program in Software-FinTech Convergence, Suwon, Korea

- Department of Software, College of Computing
- Supervisor: Prof. Hyungmin Cho | GPA: 4.08 / 4.50

Inha University

Feb. 2016 – Feb. 2020

Bachelor of Engineering in Computer Science and Engineering, Incheon, Korea

- Research Advisor: Prof. Youngtae Noh | GPA: 3.77 / 4.50 | Converted Score: 91.66 / 100

PUBLICATIONS

1. **Detecting Cache-based Side-Channel Attacks by Leveraging Mesh Interconnect Traffic Monitoring**
   The 40th Annual ACM Symposium on Applied Computing, SAC'25, March 31–April 4, 2025, Sicily, Italy.
2. **Detecting Anomalies in Time-Series Data using Unsupervised Learning and Analysis on Infrequent Signatures**
   Journal of IKEEE, 24(4), 1011–1016, Dec. 2020.

RESEARCH & WORK EXPERIENCE

SKKU Computing Platforms Laboratory

Mar. 2020 - present

Graduate Researcher, Suwon, Korea

- Conducted research on mesh-interconnect architectures across modern server and cloud platforms, including Intel Xeon Scalable processors, Arm Graviton processors, Google Cloud, and Alibaba Cloud environments.
- Researched security vulnerabilities in processor interconnect architectures.
- Developed traffic-monitoring analysis systems for mesh interconnects.

Sungkyunkwan University

Sep. 2024 - Feb. 2026

President, CSA, Natural Science Campus, SKKU, Suwon, South Korea

EnF Advisor Co., Ltd.

Aug. 2023–Feb. 2024
Aug.–Nov. 2024

Data Analyst Intern, Yeouido, Seoul, Republic of Korea

- Assisted in developing results evaluation system and supported data-driven performance analysis.
- Maintained NAS infrastructure and Synology DSM daily operations.
- Supported landing page development and internal system maintenance.
- Participated in data analysis for Yellow Umbrella Mutual Aid Association's financial estimation project.

Inha University, Networked Systems Laboratory

Feb. 2019 – Aug. 2019

Undergraduate Research Intern, Incheon, Korea

- Conducted research on deep learning-based emotion recognition and low-energy position tracking systems.

Well-being Health Pharm Trade Company Jun. 2018 – Aug. 2018

Trade Assistant Intern, Incheon, Korea

- Supported product research, market analysis, marketing materials, advertising, and document translation.

Inha Tutoring Program 2018 – 2019

Mentor, Inha University, Incheon, Korea

- Mentored students in Discrete Mathematics and Python programming.

PROJECTS & COMPETITIONS

Online Channel Product Sales Forecast AI Competition Jul. 2023 - Aug. 2023
Built forecasting approaches for online channel product sales using machine learning and data analysis methods.

B2B Sales Opportunity Creation Forecast Model based on MQL Data Feb. 2024
Developed a predictive modeling workflow for B2B sales opportunity creation using MQL data.

SELECTED AWARDS

- International Scholarship, Inha University, 2016, 4 years
- STEM Scholarship, Department of Software, SKKU Ph.D. Program, 2020, 6 years
- 9th place among 267 teams, HAICon 2020 Industrial Control System Security Threat Detection AI Competition
- Individual Award, SKKU Graduate School of Integrated Security Hackathon, 2021
- Third Prize, China-Korea College Student Debate Contest, Chinese Embassy in Korea
